- Wade Allen (via hand delivered letter) – Believes it is a great idea as simple rentals are needed in the community.

Ms. Buchanan reported receiving a verbal concern regarding septic fields utilized by seniors' specifically due to medication concerns and, in the opinion of the resident, it could affect the town's water source.

Referral Comments Received:

- Simpco First Nation – Requested that a service agreement for a field assessment be signed with them before any disturbance of soil.
- Interior Health Authority (IHA) – Reported an overall support of the project for it provides much needed housing in the community and supports Barriere's Official Community Plan goals. IHA suggested that the applicant consider shade trees to help keep homes cooler in extreme heat events.

After the Mayor called for public comments, the following statements and questions were presented by those appearing in person or online:

- Janet Lanoville (in person) – Expressed her opinion that the proposal is a very good idea and needed in the community.
- Dennis Redford (in person) – Explained that as a retired wastewater professional, he has concerns regarding medication disposal into septic fields as it will make its way to the river and town water source. He stated his belief that the local government should invest in a traditional, town-wide, sewer system. He isn't opposed to seniors housing in principal, however, he believes it should be on a municipal sewer system.
- Al Fortin (online) – Will the wastewater system of the development be turned over to the municipality to operate and maintain once construction is completed? Answer from staff: No, just as with any private septic field, the system will remain a private system which is owned by, and is the responsibility of, the property owner.
